This is the submission file for assignment 3. I sincerely apologize as I have tried to conclude everything in 3-4 pages, but unfortunately, I have crossed the limit. Also, I have done exact inference first and then approximate inference at the end.

Vandit Jyotindra Gajjar , 31 May at 19:59

Conclusion and comparison added between exact and approximate inference.

Vandit Jyotindra Gajjar , 2 Jun at 23:24

exact: 3 and 4 are incorrect. check calculation. 22.5/30

approx: how you get random value. how the values map to samples? -- this is a very important part to assess. 32.5/40

discussion: missing. just provide a conclusion. 15/30
